CSPN Names Gerry Crocker CEO

Drexel Hill, PA – Community Specialty Pharmacy Network (CSPN) President Ed Dillon today announced Gerry Crocker as the new Chief Executive Officer. “On behalf of the Board of Directors of CSPN, I am extremely pleased and excited to have Mr. Crocker join our team in a leadership position as our CEO. Gerry’s unique and extensive background in our industry at all levels including wholesale, community-based retail groups, and national organizational activities along with his passion for success make him the ideal individual to lead us onto the national stage as a major player in the Specialty Pharmacy arena” stated Mr. Dillon.

From 2007 to present Mr. Crocker was CEO of Alexandria, VA-based CARE Pharmacies, Inc. Gerry served as Vice President of Retail and Alternative Care, North East Area for Cardinal Health before joining CARE Pharmacies. Mr. Crocker stated, “I am honored to have been selected for this exciting role. CSPN is poised to deliver a uniquely superior offering in the Specialty Provider Network channel. CSPN has developed a “high tech/high touch” solution to address the needs of PBMs, payors and manufacturers who operate in this high growth market. While our technology is based on accurate clinical data collection, what makes us strong is our dedicated focus on the patient. We believe the specialized care they receive will result in a positive outcome while collecting data for the continuation of their therapies, especially the core treatments of oncology, multiple sclerosis, rheumatoid arthritis, and HIV/AIDS.”

CSPN’s comprehensive resources include clinical pharmacists on-site at each pharmacy for one-on-one consultations and treatment support. Soon the company’s customer call center staff will include licensed pharmacists and nurses to coordinate patient care, expedite delivery through a network of community pharmacies, and monitor utilization and outcomes on an individual basis. This approach will provide PBMs a superior specialty provider network so they may retain their patients rather than referring them to competing PBMs for their unique pharmacy needs.

CSPN is the largest community specialty network in the country with over 146 member pharmacies that provide a unique distribution channel which allows immediate availability of critically required specialty medication. It is delivered by a compassionate, highly competent staff of pharmacy professionals dedicated to improving patients’ lives. For more information about CSPN visit www.cspnrx.com.
