### **CSPN Names Gene Dorr, Senior Analyst**

**Drexel Hill, PA** – Community Specialty Pharmacy Network (CSPN) CEO Gerry Crocker today announced Gene Dorr as the new Senior Analyst. Gene's unique and extensive background in the data industry at all levels including reporting, trend analysis and pharmaceutical experience along with his drive for success make him the ideal individual to lead us onto the national stage in the Specialty Pharmacy arena.

Gene Dorr, Senior Analyst, has joined CSPN as our organization's Data Services lead. In this position, Gene will coordinate efforts with software vendors and data aggregators to facilitate contract agreements. Prior to CSPN, Gene worked as a Client Services Business Manager with IMS Health, where he served as the lead on documentation creation for all reporting and analyses requirements and translating client's reporting needs into action plans. Additionally, Gene provided training and consulting services to the key business and technology users. Prior to IMS, Gene was Director, Data Analysis for a national PBM. In this role, Gene managed the reporting and data analytics team, which supported internal and external clients with standard and ad hoc reporting, scenario analyses, trend analyses, provider profiling, and MedInitiatives inform suite training. In addition to more than ten years of experience in healthcare technology and analytics, Gene also has significant experience working with an industry leading pharmaceutical organization and for New Jersey's largest healthcare management organization. Gene received his Master's Degree in Business Administration from La Salle University and his Bachelor's Degree in Zoology from the University of Maine.

CSPN's comprehensive resources include clinical pharmacists on-site at each pharmacy for one-on-one consultations and treatment support. Soon the company's customer call center staff will include licensed pharmacists and nurses to coordinate patient care, expedite delivery through a network of community pharmacies, and monitor utilization and outcomes on an individual basis. This approach will provide PBMs a superior specialty provider network so they may retain their patients rather than referring them to competing PBMs for their unique pharmacy needs.

**CSPN** is the largest community specialty network in the country with over 150 member pharmacies that provide a unique distribution channel which allows immediate availability of critically required specialty medication. It is delivered by a compassionate, highly competent staff of pharmacy professionals dedicated to improving patients' lives. For more information about CSPN visit [www.cspnrx.com](http://www.cspnrx.com).
